- **Technologies:** GitHub:, Visual Studio, Firebase, IntelliJ Idea, Android Studio, Microsoft Visio, Git for source control, Microsoft Azure, cPanel, Heroku

Education

Computer Programmer, Diploma Program, Co-op
Georgian College, Barrie, ON

September 2018- Present

Work Experience

Crew Member

Sep 2018 - Present

New York Fries, Barrie, Ontario

- Efficient **adaptability skills** by prioritizing multiple tasks between workmates at the peak time of the business and completing assigned duties in a specific timeframe under pressure.
- Excellent teamwork skills in the workplace such as quickly choosing with collaborators to conclude who does what work hence being an efficient **team player**.
- Devised and implemented faster processes for serving customers during busy periods especially Christmas such as taking the **initiative** of suggesting having two cash counters.
- Assisted new- work mates during training utilizing **excellent problem solving skills** to ensure the proper flow of work.

ACADEMIC PROJECTS/ EXPERIENCE

Covid-19 Tracker

Technologies Used:- Visual Studio Code, React.js, NPM, Firebase, Material UI

- Developed React application that keeps track of covid-9 cases globally by fetching data from disease.sh API that includes dropdown, map, table, line graph, infobox etc.
- Clients can hover over the circles on the map and a popup displaying the Country, Total cases, Deaths and Recovered Cases.
- <https://github.com/parthkumar9/covid-19-tracker>

GitHub Jobs

Technologies Used:- Visual Studio Code, React.js, NPM, Firebase, React-bootstrap

- Developed the React app that works with the GitHub Jobs API that includes search, filter, pagination.
- Users can view the job details and find a link to apply for the job as well.
- <https://github.com/parthkumar9/Github-Jobs>

Portfolio Website

Technologies Used:- HTML5 , JavaScript, CSS3

- Developed a HTML website that visualizes my skills and projects over the web.
- Designed and built the website using mainly css flexbox and grid for the four sections as well as the layout in the Intro.
- Created four different themes for the website all using JavaScript.
- <https://github.com/parthkumar9/Portfolio>

Employee Register

Technologies Used:- Visual Studio 2019 , C#, MySql

- Developed a C# .NET Core MVC Web Application where you can store your Company Department and Employees information on Visual Studio Enterprise 2019.
- Implemented CRUD operations as well as applying social authentication using Google API, to publishing it on a web server.
- Unit Tested almost all the methods and functions to implement Test Driven Development
- <https://github.com/parthkumar9/Employee-Register>

Systems Analysis and Design

Sep 2020- Present

- Worked with graphical(diagramming) techniques to object oriented and systems analysis methodologies such as swim line diagram to an existing school system.
- Documented the current process as understood and explained clearly what needs to be done and the problem statement for every swim line
- Applied knowledge from the swim line diagram to create a visio diagram that articulates the new design of the school system.
- Visualizing my work based on a framework, and designing a framework of the mobile application on Visio again with a clear process flow both on the user and administrator ends.

Certifications

- Health And Awareness Training (Ministry of Labor) Sep 2018
- SafeTALK Sep2019
